Economical, compact dust collector for bins and material receivers.

**Two Basic Styles**
- A Style with plenum only; bags hang directly in the receiver.
- B Style includes plenum and housing. Size ranges from four to ten feet.

**Features**
- Shipped completely assembled for rapid installation.
- Simple design for easy maintenance.
- High efficiency: 99.9%
- Filter areas from 25 to 106 ft²
- All headers, pipes, and valves shipped installed and wired to solenoid valves and timer.
- Welded 12 gauge carbon steel construction.
- Operating pressure to 30” w.g. std. (higher levels available).
- Standard operating temperatures to 200°F.

**Delivered with:**
- Aluminum venturis
- Stainless steel bag clamps
- ¼” 10 wire carbon steel smooth retainers
- Compact mounted timer assembly
- Manometer or magnehelic gauge with fittings ready for installation
- Door in housing (B Style) for easy side bag removal
- Primed carbon steel surfaces
- NEMA 4 solenoid valve and timer enclosures

**Options**
- Stainless steel tube sheet, housing, and/or venturis
- Special interior or exterior coatings to your specification
- Explosion proof electricals
- 425°F temperature capability
- Bag grid and/or man grid
- High quality Mikro bags in wide variety of materials and finishes
- All surfaces that may come in contact with dust or product can be fabricated of stainless steel or other materials
- All surfaces that may come in contact with gas can be fabricated of stainless steel or other materials
### Style A
